MGC Platform — Role-Based Access

Mini Greens Company (MGC) will operate through a single digital platform where **Customers, Partners, Cafés/Shops, and Admins** access different features based on their role.

Core Concept

One MGC Platform → One Database → Multiple Roles → Different Dashboards

1. Customer Role 👤

Customers register once and get access to the **Customer Dashboard**.

Customer can:

- Browse MGC products
- Place normal orders
- Pre-order products
- Subscribe to weekly/monthly plans
- Manage subscriptions
- Track orders
- View order history
- Receive notifications
- Receive offers and discounts
- Receive birthday rewards
- Manage addresses

- Manage personal profile

Customer information:

- Name
- Phone
- Email
- DOB
- Address
- Order history
- Subscription history

The **DOB** will allow MGC to automatically identify upcoming birthdays and send birthday offers/gifts.

---

2. Partner Role 🤝

A user can choose **"Become an MGC Partner"** from within the same platform.

They don't need a separate application.

After registration and Admin approval, their account changes/adds the **Partner Role**.

Partner Dashboard

Partners can:

- View MGC products
- Place product orders
- Sell MGC products
- Manage their sales
- View earnings
- View payouts
- Track orders
- View sales history
- Manage their business profile

Partner Business Types

The same Partner system can support:

Individual Partner
Women Partner
Café
Restaurant
Shop
Fitness/Wellness Partner
Community Partner

Admin can assign different pricing and platform-fee rules to each type.

Women Partner Rule

The platform can automatically apply:

Women Partner → 0% Platform Fee

Other partner categories can have configurable fees.

---

3. Café / Shop Role ☕

Cafés and shops can also operate through the **Partner Role**.

For example:

> Café needs 50 packs of microgreens.

They open the MGC app → Partner Dashboard → **Place Business Order**.

They enter:

- Café/Shop name
- Contact person
- Phone
- Address
- Product
- Quantity
- Required delivery date
- Additional instructions

The order immediately appears in the **MGC Admin Dashboard**.

This means MGC doesn't need a separate café application.

---

4. Admin Role 🛠️

Admin is the **control center of the entire MGC Platform**.

Admin can access:

Customers

- Customer list
- Profiles
- Orders
- Subscriptions
- Purchase history
- Birthday information

Partners

- Partner applications
- KYC/details
- Partner type
- Sales
- Earnings
- Platform fees
- Payouts

Orders

- Customer orders
- Pre-orders
- Subscription orders
- Partner orders
- Café/shop orders

Products

- Products
- Pricing
- Stock
- Availability
- Pre-orders

Subscriptions

- Active subscriptions
- Upcoming deliveries
- Paused subscriptions
- Cancelled subscriptions
- Subscription revenue

Discounts

- Coupons
- Percentage discounts
- Flat discounts
- Birthday offers
- Subscription discounts
- Partner discounts
- Café/wholesale pricing

Reports

- Sales
- Customers
- Partners
- Products
- Subscriptions
- Revenue
- Discounts
- Payouts

Reports can be downloaded as:

PDF / Excel / CSV

---

5. Role-Based Access System

The important technical concept is:

One Account System

When someone registers:

User creates account
↓
MGC identifies their role
↓
Role-based permissions
↓
Relevant dashboard opens

For example:

Customer

Login
↓
Customer Dashboard
↓
Products | Orders | Subscription | Offers

Partner

Login
↓
Partner Dashboard
↓
Products | Sales | Orders | Earnings

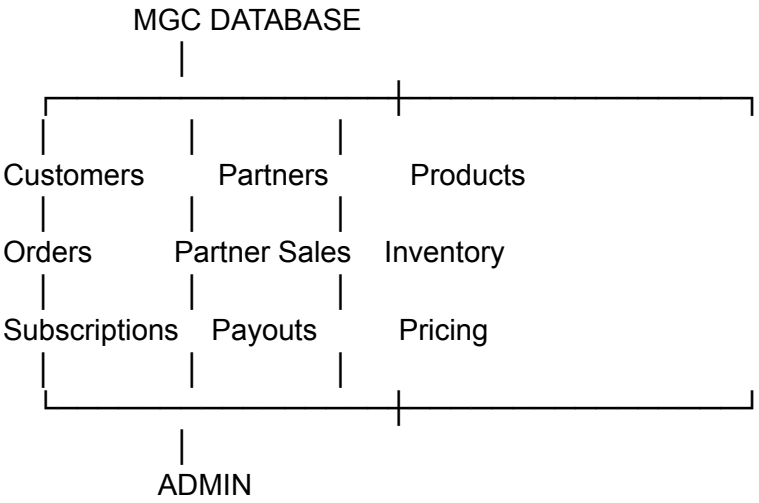

Admin

Login
↓
Admin Dashboard
↓
Everything

---

6. One Central MGC Database

Everything should connect to the same platform.

This is important because Admin can see the **complete business picture in one place**.

---

7. Automated Order Flow

The platform should automate the entire process.

Customer Order

Customer places order
↓
Order created
↓
Admin Dashboard notification
↓
WhatsApp notification to Admin
↓
Admin confirms
↓
Order processing

↓
Delivery
↓
Customer notification
↓
Order completed
↓
Sales report updated

Partner Order

Partner places order
↓
MGC receives order
↓
Admin notification
↓
Admin processes order
↓
Partner receives order update
↓
Sale recorded
↓
Partner earnings calculated

---

8. MGC Platform Business Model

This makes the MGC app more than a simple ordering application.

It becomes:

MGC — A Unified Healthy Food & Microgreens Platform

Customers come to MGC to **buy and subscribe**.

Partners come to MGC to **start and grow their own small business**.

Cafés & Shops come to MGC to **source products**.

Admin uses MGC to **control and operate the entire ecosystem**.

The simplest positioning:

One Platform. Multiple Roles. One MGC Ecosystem.
